Re: Green Party of Canada Election Platform

Dear Ms Paul,

I am writing to you on behalf of the Canadian Dental Association (CDA), Canada's national voice for dentistry. As a federation of Canada's provincial and territorial dental associations (PDAs), CDA represents over 21,000 practising dentists from coast to coast to coast and is dedicated to the promotion of optimal oral health, an essential component of general health, and to the advancement and leadership of a unified profession.

COVID-19 has had a transformative impact on the health and well-being of Canadians. Despite the challenges to maintain a safe environment for patients and staff, dentists have continued to provide important emergency and routine care to their patients throughout the pandemic. While the pandemic has brought to light new challenges for the delivery of dental care, it has also underlined existing problems Canadians face in achieving and maintaining their oral health and in receiving dental treatment. The COVID-19 experience has also served as a reminder of the benefit of proactive health measures, such as promoting healthy eating and ensuring the overall health of seniors in long-term care (LTC) facilities.

…2

This election, we hope that you will incorporate our recommendations into the Green Party's election platform or individual policy proposals. Notably, these include:

- Supporting a detailed Parliamentary study on improving dental coverage for Canadians, rather than immediately introducing a new, large-scale federal dental care program;
- Making an interim investment of $600 million over the next 5 years to maintain and expand existing dental care programs delivered at the provincial and territorial level, particularly those serving vulnerable populations; and
- Ensuring any new national standards developed for LTC facilities include a standard related to oral health.

CDA is also making recommendations related to supporting dentists and dental offices – many of which are small businesses – as Canada transitions to life post-COVID, and promoting healthy eating, particularly among children.

We kindly request that, regardless of whether these recommendations are included in the Green Party's election platform or policy proposals released during the campaign, that you or a member of your campaign team replies to CDA indicating the official Green Party position on each recommendation. Should you, or members of your campaign team, wish to discuss these recommendations – or other issues relating to the dental profession and the oral health of Canadians – please do not hesitate to reach out.

Sincerely,

Dr. Richard Holden
President
Canadian Dental Association
