

Hello everyone,

Please let us know the number of patients that have contacted you since March 13 and need to be seen. We are trying to get an idea of how many patients are waiting to be seen so we can share this information with the CPHO. Please fill this form out individually or indicate if your number is referring to patients of multiple dentists.

As usual, please use the link provided to submit your response so that everyone's answers are together and accounted for.
